Person ID	Concept of app	App found/ Name	Likes	Dislikes
1	Convert certain Images to PDF	App Found. Name: CamScanner	It aptures image of a document with perfect edges.	Symbol of app is printed on all pages when images are converted to pdf. Also, the images quality is bad after conversion.
2	Car sharing or Car pooling	App found. Name: Waze	Freat app for nevigations, showing real time accidents and cops on route.	Not efficient in finding people who are travelling in same direction.
3	Gift Suggesting app	App found. Name: Giftly	Great app. Asks user about the person they wants to gift. Their hobbies, dislikes, etc.	
4	Borrowed or loaned money tracking app	App found. Name: Debt Manager and Tracker	It is a good initiative. It can be used for keeping records of loaned money. But not brrowed.	When the money is returend, and we close the account in app, there is no history tab which keeps record of this transections.
5	Leftover Food Donation app	App found. Name: Too Good To Go.	I found good reviews of this app on Google Playstore.	Not available in my location. Probably because it is not well-known yet. But it is a great start.

Improvements	Age	Gender	Education	Comments [optional]
Remove all kinds of ads from pdf, generated by app. Improve image quality in different light conditions.	19	Gender [Male]	Junior in College	
Create an app that can tell a person that another person is also travelling to same destination at particular time. So, if he is interested in getting ride.	22	Gender [Male]	Senior in college	
Improvements: Currently None.	45	Gender [Female]	Education/occupation [optional]	This app looks good. It recommends nice gifts for a particular person.
It would be better if we can take real time images and save it with reference so that it is easier to remember and keep track of. It should also have a history page where we can go check if th eperso had ever borrowed or loaned us money even if the account is closed.	51	Gender [Male]	Education/occupation [optional]	
I opened this app and I didnt found any restaurants in the max range in this app. This app is designed very well but very less people know about it.	22	Gender [Male]	Senior in college	I want to design an app that can be handeled by restaurants as well as people. With the help of both interection, it will be easier for restaurants to tell people in nearby areas about leftover food availablity.
